About Me

I have long been passionate about the culinary arts including cooking and baking. I have always enjoyed to cook for my family as well as bake for a special occasion in order to demonstrate my love. When it came time for me to make a decision regarding my continued education at college, I felt there was no better place for me than the Culinary Institute of America where I could specialize in pastries, baking, and confectionaries.

Experience

Chick-Fil-A

Front House

In this position I was exposed to a fast paced environment which taught me many lessons among which was working underpressure, with time constraints, and customer satisfaction. I worked numerous stations including the register, the window, at the fountain drinks/shake station, back of house, and taking orders.

Montillo's Bakery

Decorator

I practiced under the experienced guidance of supervisors at Montilio's bakeshop which helped hone my existing skills as well as teach me more. I worked in the cupcake department frosting, decorating seasonal items, decorating custom confectionaries, and packaging products.

Education

2022
